■ How to distinguish in CD unit

■ Interchangeability

The "NEW" Traverse Deck (Ass'y) (RAE0152Z) and the "FORMER" Traverse Deck (Ass'y) are interchangeable.
Even if the CD unit has the former servo P.C.B., only the traverse deck is changeable to the new one.

■ NEW/FORMER COMPATIBILITY

In regard Traverse deck ass'y and CD Servo P.C.B., New and Former are not compatible with each other. When repairing, make sure of the New/Former compatibility and use proper parts.

In accordance with the above-stated change, several CD unit parts have been changed.
For the changer parts, refer to page5.

PRECAUTION OF LASER DIODE

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.
Wave length: 780nm
Maximum output radiation power from pickup: 100µW/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

ACHTUNG: Dieses Produkt enthält eine Lasereinheit. Im eingeschalteten Zustand wird unsichtbare Laserstrahlung von der Lasereinheit abgestrahlt.

Wellenlänge: 780nm

Maximale Strahlungsleistung der Lasereinheit: 100µW/VDE

Die Strahlung an der Lasereinheit ist ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Lasereinheit gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinheit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlinse blicken.
4. Nicht über längere Zeit in die Fokussierlinse blicken.

ADVASEL: I dette apparat anvendes laser.

CONNECTIONS

Before connecting the changer to your audio system, make sure that the power of the changer and all other system components is turned off.

- Although the figure below shows the AC power supply cord being connected to a household AC outlet, if the amplifier (or receiver) is equipped with an AC outlet, connect the cord to that outlet.
- The configuration of the AC outlet differs according to area.

Stereo connection cable

White (L) ————
 Red (R) ————

[For (EB) area only]

BE SURE TO READ THE CAUTION FOR AC POWER SUPPLY CORD ON PAGE 4 BEFORE THE FOLLOWING CONNECTIONS.

[For (GC) area only]

Set the voltage selector to the voltage setting for the area in which the unit will be used.
 [Use a minus (–) screwdriver]

Note

If the power supply in your area is 117 V or 120 V, set to the "127 V" position.
 Note that this unit will be seriously damaged if this setting is not made correctly.

If the power plug will not fit your socket, use the power plug adaptor (included).

[For (E, EB, EG, GC) areas]

Insertion of Connector

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

REPLACEMENT OF THE FOOT

- Remove the 4 heat melted posts on the Bottom board ass'y with a pair of nippers or similar tool.
- To replace the foot (RKA0053-A) on the Bottom board ass'y melt the 4 posts with a soldering iron or install it with a screw (XTB3+6J).

■ CAUTION FOR AC MAINS LEAD

For (EB) area.

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 5-ampere fuse is fitted in this plug. Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362. Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced. If you lose the fuse cover the plug must not be used until a replacement cover is obtained. A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY. THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below. If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:
Blue: Neutral, Brown: Live.
As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL $\perp$ OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

■ CAUTIONS CONCERNING THE MOVING OF THIS UNIT

CAUTION

Before moving the changer to another location, be sure to carry out the "Preparations for moving the unit" described below.

Failure to do so will expose the compact discs and the changer to the risk of severe damage.

Preparations for moving the unit

All of the discs must be removed so that the trays are completely empty. Use the following procedure.

- ① Press **POWER** to switch off the unit.
- ② Press **POWER** to switch on the unit.
(If there is a disc in the play section, it will be returned to the disc tray at this time.)
- ③ Press **OPEN/CLOSE** to open the loading drawer.
- ④ Press **DISC SKIP** to rotate the disc trays and remove the discs from all disc trays.
- ⑤ Press **OPEN/CLOSE** to close the loading drawer.
- ⑥ Press **POWER** to switch off the unit.

If you have pressed a wrong button by mistake, return to step ①.

BASIC OPERATIONS

Sequential play

All of the discs will be played, beginning from track 1 on the selected disc.

The explanation below is an example of operation in the case where all five disc trays in the changer are holding CDs.

Note
Do not load 3" (8 cm) and 5" (12 cm) discs on the same disc tray.

CAUTION

Do not touch the loading drawer and carousel while they are in motion, and do not attempt to rotate the carousel by hand; doing so could result in incorrect operation of the unit and/or damage to the discs.

Illuminates when a disc is in the disc tray. If there is no disc in the disc tray, the indication disappears when the disc tray comes to the play position.

The changer plays all the tracks on all the discs in order and stops automatically when the last track on the last disc finishes playing. The first disc will then be at the playing position.

To directly access a desired track

To select a track between 1 and 10:

Press the corresponding number on the numeric button.

To select a two-digit track number over 10:
First press >10, and then press the numbers for the two digits.

For example; number 20:
Press >10, then 2, and then 0.

To exchange discs during play

While playing a disc, it is possible to change the other discs without interrupting play.

① Press **OPEN/CLOSE** to open the loading drawer.

Discs which can be changed.

② Press **DISC SKIP** to rotate the disc trays and exchange the discs.

The carousel will move by one disc tray. Pressing again moves the carousel in the opposite direction by two disc trays.

③ Press **OPEN/CLOSE** to close the loading drawer.

Note

If you play a disc with the loading drawer open, discs other than the current disc cannot be played.

To temporarily stop play

To resume play

To stop play

The display will show the total number of tracks and the total playing time of the current disc.

The total playing time displayed includes the silent sections between tracks. For this reason, it may be a few seconds longer than the playing time indicated on the disc.

To resume play

CAUTION

Do not move this changer with a compact disc inside the unit. If a disc comes off the disc tray, it might be scratched or the changer might become incapable of playing. (Refer to "Cautions concerning the moving of this unit" on page 5.)

SELF-DIAGNOSTIC DISPLAY FUNCTION

Self-diagnostic display

This unit is equipped with a self-diagnostic display function which, if a problem occurs, will display an error code corresponding to the problem. Use this function when performing maintenance on the unit.

Display procedure

Entering the Self-Diagnostic Mode

1. With no CD loaded in the tray, turn on the unit.
2. Unplug the power cord of the unit, and then plug it back in while pressing the STOP (■), PLAY (▶) and DISC 4 buttons together. This will bring up the FL display.
3. Release the above three buttons.

To Display Self-Diagnostic Results

1. When the FL display lights up, the unit automatically repeats an approximately 50-second cycle of the following operations.

※

Tray opens. ④

Tray closes. ⑤

Tray opens. ⑥

Traverse deck lifts. ⑦

Tray closes. ⑧

Traverse deck lowers. ⑨

Rotary tray turns counter-clockwise two disc slots. ⑩

Traverse deck lifts once, and then lowers. ⑪

※

2. Self-diagnostic fault results appear on the FL display for approximately one second as "H15" at location ④, "H16" at ⑤ and "F18" at ⑩, during the above cycle.
3. If there are no faults as a result of self-diagnostic, "CD TRACK 00:00" appears on the FL display.

To Return to Normal Display

• Press the power button to turn off the unit, and then turn it on again.

To Display Self-Diagnostic Results Again

• Follow steps 1 through 3 of "Entering Self-Diagnostic Mode" above.

To Clear the Display of Self-Diagnostic Results

• Turn off the unit to clear the contents of the stored fault results.

Interpretation of error codes

Error code	Problem condition	Correction procedure
H15	CD tray does not open or close when CD tray open/close (▲) button is pressed.	Faulty loading motor and motor drive IC (IC501), or faulty contact or short-circuit on open/close detect switch, S551. (Check and replace)
H16	When the CD tray open/close (▲) button is pressed, the CD tray closes momentarily but then opens again, or opens momentarily and then closes again.	
F18	Faulty rotary turret rotation detection. Example: The turret continues to turn at the initial position without stopping.	Check the optical sensor (D501) and replace if necessary.

HANDLING PRECAUTIONS FOR TRAVERSE DECK

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body. So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an antistatic shorting pin is inserted into the flexible board (FFC).
When removing or connecting the short pin, finish the job in as short time as possible.
3. Take care not to apply excessive stress to the flexible board (FFC).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

Grounding for electrostatic breakdown prevention

1. Human body grounding
Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
Put a conductive material (sheet) or steel sheet on the area where the optical pickup is placed, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).

DISASSEMBLY INSTRUCTIONS

"ATTENTION SERVICER"

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

Warning: This product uses a laser diode. Refer to caution statements on page 2.

ACHTUNG: • Die Lasereinheit nicht zerlegen.

• Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

Removal of the traverse deck ass'y

Procedure
1 → 2 → 5 → 27
→ 30 → 31

1. Widen the bosses by using a regular screwdriver or similar object.

2. Pull out the pins.

2. Release the claw, and then remove the traverse deck ass'y in the direction of arrow ②.

Caution:
Be careful not to lose the 3 springs because those will also be removed on removal of the traverse deck ass'y.

■ INSTALLATION OF SERVO P.C.B.

1. When installing servo P.C.B., move the optical pickup to the more external side than the mark (▲).
(When the optical pickup is not moved, the switch(S701) on the servo P.C.B. may be broken.)

2. Connect the FFC to the connector(CN701).

3. Install the servo P.C.B. to the traverse unit with 3 screws (① ~ ③).

4. Solder the 2 terminals of the traverse motor and the 2 terminals of the spindle motor.

Note: • Insert the FFC into the connector and lock securely.
After installing the motor with screws, solder each motor terminal.

Installation of the traverse deck ass'y

1. Push the claw in the direction of arrow ①, and then move the slide plate(1) in the direction of arrow ②.
2. Move the slide plate(2) in the direction of arrow ③.

3. Align the 3 bosses of traverse deck ass'y with the slots of mechanism base ass'y.

Installation of the drive lever

1. Rotate the pulley gear to full position in the direction of arrow.
2. Align the boss(A) with the hole of slide plate(2).
3. Align the boss(B) with the hole of slide plate(1).
4. Align the claws of drive lever with the slots of loading mechanism ass'y.

Positioning of the drive cam

1. Rotate the pulley gear to full position in the direction of arrow ①.
2. Then, rotate the pulley gear in the direction of arrow ②.
3. When the drive gear(1) stops rotating, turn off that pulley gear is rotating.

Installation of the tray ass'y

1. Attach the FFC to the connector(CN403).
2. Fit the claws on the right side of the tray ass'y underneath the claws on the tray base guide(R).
3. Fit the claws on the right side of the tray ass'y underneath the claws on the tray base guide(L).
4. Fit the limiter claw on the tray ass'y between the teeth of the drive gear(1).
5. Catch the 2 claws(A) with the mechanism base ass'y.
6. After installing the tray ass'y, check that it moves smoothly.

HOW TO CHECK THE MAIN AND SERVO P.C.B.

1. Remove the cabinet. (See Ref.No.1 of the disassembly instructions.)
2. Remove the front panel ass'y. (See Ref.No.2 of the disassembly instructions.)
3. Remove the tray ass'y. (See Ref.No.5 of the disassembly instructions.)
4. Remove the cable holder. (See Ref.No.8 of the disassembly instructions.)
5. Remove the clamp plate ass'y. (See Ref.No.10 of the disassembly instructions.)
6. Remove the fixed plate, magnet and clumper. (See Ref.No.11 of the disassembly instructions.)

Check the main P.C.B.

How to play the disc

Service Mode setting

When checking the main/servo P.C.B. of this set, remove the rotary tray previously. After the rotary tray is removed, the microcomputer is kept from issuing PLAY command even when the PLAY key is pressed. Stated above is the procedure of setting the Service Mode for keeping the microcomputer in the PLAY mode even after removal of the rotary tray.

● Check the servo P.C.B.

- 7. Remove the mechanism base ass'y. (See Ref.No.12 of the disassembly instructions.)
- 8. Remove the traverse deck ass'y. (See Ref.No.27 of the disassembly instructions.)

- 9. Replace the FFC of servo P.C.B. to the FFC (CN401) of main P.C.B.

Service Mode setting

When checking the main/servo P.C.B. of this set, remove the rotary tray previously.
After the rotary tray is removed, the microcomputer is kept from issuing PLAY command even when the PLAY key is pressed. Stated above is the procedure of setting the Service Mode for keeping the microcomputer in the PLAY mode even after removal of the rotary tray.

- 10. Connect the FFC as shown in above.
Between CN401 and CN601
Between CN402 and CN602
 - 11. Insert the traverse deck in the slot of mechanism base ass'y.
 - 12. Connect the FFC of servo P.C.B. to the connector (CN301) of main P.C.B.
 - 13. Set the test disc on the traverse deck ass'y, and then fix the traverse deck ass'y with clamper ass'y.
 - 14. When checking the soldered surface of servo P.C.B., do as shown in Fig. 7.
- Notes:**
- After completing the check, restore the replaced FFC to their original positions.

How to play the disc

Unplug the set previously.

While pressing 3 keys of STOP(■), PLAY(▶), and DISC 1 simultaneously, insert the power plug of the set into the plug socket.

FL lights up?

No → Press the POWER key (POWER ON).

FL lights up.

Yes → Withdraw hand from the 3 keys.

Mount the disc on the turntable and press the PLAY key.

NOTE:
Make sure that the traverse mechanism is then in UP(PLAY)position.

■ OPERATING THE UNIT WITHOUT THE FRONT PANEL ASS'Y
(OPERATION P.C.B. AND KEYS)

A Turning off the back-up power to the microprocessor(IC 401)

- 1. Unplug the AC cord.
- 2. Short the ends of the C401 jumpers at 10 Ω (5W) resistance for at least 1 second.

B Turning the power on again

- 1. Plug the AC cord back in.
- 2. Short the between the following jumpers simultaneously:
 - The D401 cathode and R401 from IC401 (equivalent to pressing the STOP button).
 - The D401 cathode and R403 from IC401 (equivalent to pressing the PLAY button).
 - The D402 cathode and R401 from IC401 (equivalent to pressing the DISC 1 button).
- 3. Keeping the above shorts in place, short between the D404 cathode and R405 from IC401 for 1 second to turn on the power to the main unit.
- 4. Remove the shorts placed in step 2.

C Using the machine

- To play, short between the D401 cathode and R403 from IC401 (equivalent to pressing the PLAY button).
- To pause, short between the D401 cathode and R402 from IC401 (equivalent to pressing the PAUSE button).
- To stop, short between the D401 cathode and R401 from IC401 (equivalent to pressing the STOP button).
- To move forward, short between the D402 cathode and R402 from IC401 (equivalent to pressing the F.SKIP button).
- To move backward, short between the D402 cathode and R403 from IC401 (equivalent to pressing the R.SKIP button).
- To search in the forward direction, short between the D403 cathode and R402 from IC401 (equivalent to pressing the F.SEARCH button).
- To search in the backward direction, short between the D403 cathode and R403 from IC401 (equivalent to pressing the R.SEARCH button).

D Finishing off

- 1. Unplug the AC cord.
- 2. Short the ends of the C401 jumpers at 10 Ω (5W) resistance.

■ Installation of the FFC

- When connecting the FFC, connect as shown right.

- Connect as follows:
Short FFC ; between Connector S and SHORT
Long FFC ; between Connector L and LONG
- Connect the FFC (Long/Short) with blue line upward to the operation P.C.B. connectors .
- Connect the FFC (Long/Short) with blue line outward to the main P.C.B. connectors.

NOTE:

The pin numbers of each connector are marked on the P.C.B. surface.

AUTOMATIC ADJUSTMENT RESULTS DISPLAY FUNCTION (SELF-CHECK FUNCTION)

The unit contains a function which displays the result of the automatically adjustment of the servo circuits (tracking, focus servo, etc.) as an error code on the FL display. The error code display serves as a repair guide showing the automatically adjustment circuit is at fault. The procedures for displaying the error codes are given below.

Procedures to display the error code

- Procedure to display the error code before disassembly (finished unit)
 - When the [POWER] key is pressed while holding down the [STOP] [■], [PAUSE] [■] and [PLAY] [▶] keys simultaneously, the FL display illuminates, release the power turns on.
 - When the FL display illuminates, release the [STOP] [■], [PAUSE] [■] and [PLAY] [▶] keys.
 - Press the [OPEN/CLOSE] [▲] key to open the disc tray and load the test disc (SZZP1054C).
 - Press the [PLAY] [▶] key to start the play operation.
 - After the time display appears, press the [STOP] [■] key to display the error code. (e.g. E-0)
 - The error code display can be used as a repair guide showing which servo circuit is at fault. (See Error Code Based Troubleshooting.)
- Procedure to display the error code when disassembled
 - Prepare the unit as described in "How to Check the Main and Servo P.C.B." on pages 19, 20.
 - Press the [POWER] key while holding down the [STOP] [■], [PLAY] [▶] and [DISC] 1 keys simultaneously.
 - When the FL display illuminates, release the [STOP] [■], [PLAY] [▶] and [DISC] 1 keys.
 - Load the test disc (SZZP1054C) on the turntable and secure it with the clamping ass'y.
 - Perform steps 4 and 5 in section (1) above.

Error code based troubleshooting

- ※ The unit is satisfactory if the error code is E-0 of E-2.
- ※ Before testing, check that the test disc is free of scratches and dirt and optical pickup is clean.

DIGITAL SERVO SYSTEM

The following flow chart shows the sequence of automatic adjustments.

Flow chart automatic adjustment sequence

* Because the microcomputer precisely performs automatic adjustments as shown in the flow chart, it will take approx. 5 seconds to finish reading TOC data if a used disc is eccentric one or its surface is warped.

The flowchart is a comprehensive diagnostic tool for a CD player. It begins with a simple check: 'Does the test disc rotate?'. If not, the user is instructed to 'Remove the test disc'. If yes, it proceeds to 'Check if TOC reading is performed.'. If not, it again instructs to 'Remove the test disc'. If yes, it checks 'Does "PLAY" appear on the display?'. If 'Playing time appear on the display.', it enters a series of checks for IC702 pins (1, 2, 3, 7, 8, 5, 26) to determine if there's an 'IC702 failure' or a 'R726 47kΩ failure'. If 'No access' is shown, it checks the output of TJ701 RF and IC702 pins (5, 26) for 'CLVS' and 'KICK' signals, leading to 'IC702 failure' or 'R726 47kΩ failure'. If 'Playing time appear on the display.' but there's no TOC reading, it checks for lens vertical movements and laser diode operation. If the laser diode comes on, it measures voltage across R701. If above 0.8V, it's an 'Optical pickup failure (Laser diode NG)'. If below 0.8V, it instructs to 'Load the test disc' and 'Trun on close switch S790', then checks pin 15 of IC701 RFDET. If it changes from 'H' to 'L', it leads to the ECM pin check (pin 24 of IC702). If it remains at 'H', it's an 'IC702 failure'. If the laser diode doesn't come on, it checks for outputs at pins 21 and 22 of IC703. If not, it's an 'Optical pickup failure'. If yes, it checks for output at pin 20 of IC702 FOD. If yes, it's an 'IC703 failure'. If no, it's an 'IC702 failure'. If there are no lens movements, it checks the position of the optical pickup. If 'At outer or around middle track', it checks pin 1 of CN702. If 'H', it checks for outputs at pins 5 and 6 of IC703. If yes, it's a 'Traverse deck failure'. If no, it's an 'IC702 failure'. If 'L' (0V), it's an 'Inner track limit switch is defective or disconnected.'. If 'H', it checks pin 1 of CN702. If 'H', it's an 'Inner track limit switch is short-circuited.'. If 'L', it checks for output at pin 23 of IC702 TRV. If yes, it's an 'IC702 failure'. If no, it's an 'IC703 failure'.

MEASUREMENTS AND ADJUSTMENTS

Warning: This product uses a laser diode. Refer to caution statements on page 2.
ACHTUNG: • Die Lasereinheit nicht zerlegen.
 • Die Lasereinheit darf nur gegen eine vom hersteller spezifizierte einheit ausgetauscht werden.

Measuring Instruments and Special Tools

- * Test discs
 - 1. Playability test disc (SZZP1054C)
 - 2. Uneven test disc (SZZP1056C)
- * Musical program disc (ordinary)
- * Dual-beam oscilloscope with bandwidth of 30MHz or better (with EXT. trigger and 1:1 probe).
- * Allen wrench (M2.0) (SZZP1101C)
- * Lock paint (RZZ0L01)

PREPARATION

1. Remove the cabinet and front panel ass'y (refer to "disassembly instructions" Ref. No. 1, 2).
2. Set the power switch to ON and press the open/close key to close the loading drawer.
3. Press the play key and when the traverse deck reaches it's height position, set the power switch to OFF.
4. Remove the tray ass'y (refer to "disassembly instructions" Ref. No. 5).
5. Remove the clamp plate, fixed plate, magnet and clumper (refer to "disassembly instructions" Ref. No. 10, 11).
6. Place the test disc and secure it by using clumper ass'y. (Refer to Fig. 1) (refer to "disassembly instructions" Ref. No. 11).
7. Set the unit in the test mode as follows: (hold the **play**, **stop** and **disc 1** keys (3 keys) on and set the power switch to ON.)
8. Press the **play** key and play the test disc.
9. Follow the adjustment procedure.

Fig. 1

(1) MECHANICAL ADJUSTMENT

1. Connect the oscilloscope's CH. 1 probe across **TJ701** (RF) and **TJ702** (VREF) on the servo P.C.B. (Refer to Fig. 3 on page 27)
- Oscilloscope setting:** VOLT 200mV
 SWEEP 0.5μs.
 Input coupling AC
2. Switch the player power ON, and play track 19 on the test disc (SZZP1056C). (Playing any other track will prevent the HEX screws from being accessed.)
3. Leave the player in play mode and place it as shown Fig. 3.
4. Alternately adjust the two HEX screws with the 2.0mm allen wrench (SZZP1101C) until the vertical fluctuation of RF signal is minimized and the eye pattern is most stretched. (Refer to Fig. 2)
5. After completing the adjustment, lock the HEX screws with lock paint (RZZ0L01).

*Most stretched eye pattern.

Fig. 2

(2) CHECK OF PLAY OPERATION AFTER ADJUSTMENT

* Checking Skip Search

1. Play an ordinary musical program disc.
2. Press the skip button to check for normal skip search operation (In both the forward and reverse directions).

* Checking Manual Search

1. Play an ordinary musical program disc.
2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).

* Checking Playability

1. Play the 0.7mm black dot and the 0.3mm wedge on the playability test disc (SZZP1054C) and verify that no sound skip or noise occurs.
2. Play the middle tracks of the uneven test disc (SZZP1056C) and verify that no sound skip or noise occurs.

- **S701** : Rest detector.

• The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis.

Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.

* The parenthesized are the values of voltage generated during playing (Test disc 1kHz, L+R, 0dB), others are voltage values in stop mode.

• Important safety notice:

Components identified by △ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used as occasion calls. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

• The supply part number is described alone in the replacement parts.

Part No.	Production Part No.	Supply Part No.
IC11	LM2940T5M	LM2940T5

• ——— / ——— : Positive voltage lines and negative voltage lines.

⇒ : audio signal lines.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

- Cover the parts boxes made of plastics with aluminum foil.
- Ground the soldering iron.
- Put a conductive mat on the work table.
- Do not touch the pins of IC or LSI with fingers directly.

• Terminal guide of IC's, transistors and diodes.

REPLACEMENT PARTS LIST

Notes: *Important safety notice:
Components identified by Δ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.
When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
*Warning: This product uses a laser diode. Refer to caution statements on page 2.
*ACHTUNG: Die Lasereinheit nicht zerlegen.
Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.
*The "(SF)" mark denotes the standard part.
*[V] indicates in Remarks columns parts that are supplied by Video Recorder Division.
